**Course Title:** Echo Clinical Preparation

**Prefix and Course Number:** ECHO 142

---

COURSE DESCRIPTION

Students review all course materials in the first year with application on the clinical setting. Students develop skill at identification of both normal and abnormal images. Laboratory experiences are provided to allow students to develop clinical skills prior to assignment in a clinical setting.

**Course Learning Outcomes:**

**By the end of this course, a student should be able to:**

- Review clinical site policy and procedures
- Perform calculations done on the echocardiogram
- Identify appropriate student behavior in the clinical setting
- Perform limited echocardiograms under supervision

**COURSE OUTLINE:**

- I. Clinical site expectations
- II. Identification of normal and abnormal echo images
- III. Review previous student journals for lessons learned
- IV. Develop Echocardiography imaging skills
