

Course Objectives/Course Outline
Spokane Community College

Course Title: Mass Media

Prefix and Course Number: JOURN 110

Course Learning Outcomes:

By the end of this course, a student should be able to:

- Identify and examine past, present and emerging sources of mass media content.
- Explain mass media principles and theories.
- Identify how technology, content delivery mechanisms and audience participation affect the production of informative, persuasive and entertainment content.
- Critically evaluate mass media content from various sources: legacy media, social media, and emerging media.
- Identify funding models for legacy media, social media, and emerging media. Exhibit an understanding of how these funding models affect mass media.
- Critically evaluate how technological disruptions affect the funding models, content production, and consumption of informative and entertainment content.
- Analyze opinion-based content for accuracy, quality of social relevance, and support of ideas.
- Explain how mass media organizations are structured and related to each other, businesses outside of media production, and government.
- Exhibit an understanding of the effects mass media can have on the individual and society, and how individuals and society can affect these media.
- Demonstrate a knowledge of the history of mass media from the point of view of funding models, technological innovation, and cultural impact.
