

Spokane Community College

Course Title: Simulation in Nursing

Prefix and Course Number: NURS 210

Course Learning Outcomes:

By the end of this course, a student should be able to:

- Model professional behavior in a simulated patient-care clinical environment
- Collaborate with peers and interdisciplinary partners to provide holistic care during simulated patient scenarios
- Utilize current evidence and clinical judgment to ensure patient, staff, and system safety in the simulated clinical setting
- Demonstrate appropriate and compassionate nursing interventions to advocate for patient preferences, values, and needs during simulated patient clinical scenarios.
- Prioritize care based on principles of delegation, supervision, resource management, and information technology for clients in the simulated clinical environment

Course Outline:

- I. Accountability
- II. Collaboration
- III. Comfort
- IV. Technical Skills
