---

### Course Learning Outcomes

By the end of this course, a student should be able to:

1. **Professionalism:** Explain legal and ethical standards that govern professional nursing practice
2. **Collaboration:** Describe coordination with patient, family, and other healthcare disciplines.
3. **Clinical Decision Making:** Research current evidence-based practice and clinical judgement that promotes health and safety of individuals and families.
4. **Caring:** Describe the creation of partnership with the client as the source of control, and describe compassionate care based on client preferences, values and needs in times of crisis.
5. **Management of Care:** Summarize prioritization of care, and the role of resource management and information technology in patient care.
