

Course Objectives/Course Outline
Spokane Community College

Course Title: Vascular Screening Seminar

Prefix and Course Number: VASC 144

Course Description

Vascular screening seminar will be conducted weekly to discuss cases presented during the vascular screening procedures performed. A clinical consciousness will be developed with emphasis on professionalism, clinical rapport, medical ethics and patient care.

Course Learning Outcomes:

By the end of this course, a student should be able to:

- Identify and describe vascular screening expectations.
- Discuss and apply vascular screening protocols.
- Identify and apply appropriate student behavior in the clinical setting.
- Perform limited vascular screening procedures under supervision.

Course Outline:

- I. Vascular screening expectations
- II. Discuss screening protocols
- III. Review vascular screening procedures performed
- IV. Develop a clinical consciousness
