

Spokane Falls Community College
COURSE LEARNING OUTCOMES

Prefix and Course Number:	BIOL 110
Course Title:	Insects and People
Version Date: mm/dd/yyyy	1/14/2021

Course Learning Outcomes

Upon successful completion of the course, the student will be able to:

1. Demonstrate laboratory skills in the use of microscopes and measuring instruments.
2. Connect and describe anatomical function and structures in insects.
3. Illustrate insect adaptations for terrestrial and aquatic environments.
4. Describe the roles of insects in communities and ecosystems.
5. Compare the influence of insects in literature and arts of various cultures.
6. Summarize the impacts of insects upon world history, economics, and medicine.
7. Explain how community ecology influences insect diversity.
8. Compile student-led field data collections to assess insect presence, population size, or diversity.
