

Spokane Falls Community College
COURSE LEARNING OUTCOMES

Prefix and Course Number:	BIOL&160
Course Title:	General Biology with Lab
Version Date: mm/dd/yyyy	1.14.21

Course Learning Outcomes

Upon successful completion of the course, the student will be able to:

1. Explain the integration of biological concepts into daily life.
2. Articulate the relationship between structure and function within biological systems.
3. Solve problems using the basic principles of heredity.
4. Explain the importance of evolution as a core concept in biology.
5. Compare and contrast the common transformations of energy and matter for living species.
6. Summarize the mechanisms of cell division.
7. Explain how information is stored in and flows within biological systems.
8. Demonstrate skill using laboratory techniques. .
