

Spokane Falls Community College
COURSE LEARNING OUTCOMES

Prefix and Course Number:	ENGR 202
Course Title:	Dynamics
Version Date:	March 2, 2021

Course Learning Outcomes

Upon successful completion of the course, the student will be able to:

1. Analyze accelerating mechanics systems using a basic kinetics approach, a momentum approach, and an energy approach.
2. Apply the engineering format for problem solving.
3. Employ appropriate engineering language, vocabulary, and symbology.
4. Utilize computational software to analyze problem solutions and prepare quality graphs of the same.
