COURSE LEARNING OUTCOMES

| | |
|----------------------------------|------------------------------|
| Prefix and Course Number: | ENVS&101 |
| Course Title: | Environmental Science |
| Version Date: mm/dd/yyyy | 01/14/2021 |

Course Learning Outcomes

Upon successful completion of the course, the student will be able to:

1. Explain the fundamental concepts of population, community, and ecosystem ecology
2. Explain how the structure and function of ecological systems change over time and how humans affect the structure and function of these systems
3. Apply the scientific method, in addition to laboratory and/or field techniques, to address ecological questions
4. Apply ecological concepts to environmental issues and natural resource management
