

Spokane Falls Community College
COURSE LEARNING OUTCOMES

Prefix and Course Number: GEOG 101
Course Title: Introduction to Geography
Version Date: 04/03/2019

Course Learning Outcomes

Upon successful completion of the course, the student will be able to:

1. **Build geographic understanding of the world and explain the connections among peoples and places (spatial diversity and human-environment interaction)**
2. **Use the tools of geography to help explain the world and solve problems (make and use maps and diagrams depicting spatial variation of phenomena)**
3. **Map how the uneven distribution of energy leads to a diverse physical landscape including different climates, landforms, and resources.**
4. **Map how the uneven distribution of resources leads to a diverse cultural landscape including languages, political and economic systems.**
5. **Apply the tools of geography and spatial thinking to other sciences such as conflict resolution, political sciences, economics, sociology, geology, chemistry and biology.**
