

Spokane Falls Community College
COURSE LEARNING OUTCOMES

Prefix and Course Number:	GEOL& 100
Course Title:	Survey of Earth Science
Version Date:	01/29/2020

Course Learning Outcomes

Upon successful completion of the course, the student will be able to:

1. Define and articulate knowledge of earth systems concepts and dynamic processes.
2. Investigate societal challenges involving geologic hazards and resources.
3. Examine information and apply critical thinking skills, in order to develop correlation between concepts.
4. Effectively communicate ideas, investigative results, and interpretations of fundamental principles in geoscience.
5. Differentiate earth system relationships involving self, local, and global awareness through temporal and spatial scales.
