

Spokane Falls Community College
COURSE LEARNING OUTCOMES

Prefix and Course Number:	GEOL& 101
Course Title:	Introduction to Geology
Version Date:	01/29/2020

Course Learning Outcomes

Upon successful completion of the course, the student will be able to:

1. Demonstrate knowledge of earth systems concepts and dynamic processes.
2. Articulate societal challenges involving geologic hazards and resources.
3. Examine and apply critical thinking skills, scientific methodology, and quantitative analysis in both lecture and lab.
4. Correlate earth materials and processes through the observation and interpretation of data collected during lab activities.
5. Differentiate earth system relationships involving self, local, and global awareness through temporal and spatial scales.
