Spokane Falls Community College
COURSE LEARNING OUTCOMES

Prefix and Course Number:	**GRDSN 101**
Course Title:	**Design Process I**
Version Date: mm/dd/yyyy	**10/30/2019**

Course Learning Outcomes

Upon successful completion of the course, the student will be able to:

1. Research and identify design elements / principles used in professional level work.

2. Develop design solutions that demonstrate effective use of the Gestalt principles (similarity, proximity, continuation, closure, figure / ground).

3. Solve design problems by generating work with both relevant and unique solutions.

4. Show a clear understanding of visual hierarchy.

5. Generate constructive criticism during the critique process.

6. Produce and create design solutions that tell a story, express a feeling, and have an attention to detail.

7. Demonstrate effective time management, planning, and concept generation.
