Prefix and Course Number:	**GRDSN 122**
Course Title:	**Design Technology III**
Version Date: mm/dd/yyyy	**10/21/2019**

Course Learning Outcomes

Upon successful completion of the course, the student will be able to:

1. Identify types of grid systems for use with typography and layout.

2. Compare RGB and CMYK in order to effectively color match.

3. Prepare projects for presentation and optimal display performance on screen.

4. Define and demonstrate knowledge of trapping, overprinting & knockouts for screen printing.

5. Develop a comprehensive file structure with proper naming conventions and collect files for delivery to service provider.

6. Create page layouts using styles, master pages for reoccurring page elements and modify images using resampling and resizing methods for efficient workflow.

7. Observe, explore and create a WordPress site.
