Spokane Falls Community College
COURSE LEARNING OUTCOMES

Prefix and Course Number:	GRDSN 221
Course Title:	Design Process VI
Version Date:	03/11/2020

Course Learning Outcomes

Upon successful completion of the course, the student will be able to:

1. Identify previous work to be improved upon in order to meet entry level industry standards.

2. Evaluate design projects and determine how they can be improved through group critiques and instructor's direction.

3. Analyze and describe revisions to previously produced projects using design terminology.

4. Simulate real-world production with use of mockups and industry driven techniques.

5. Prepare speaking points for future interview scenarios.

6. Practice interview skills and professional etiquette through one-on-one mock interviews.

7. Choose a direction for personal branding and collaborate with instructor on how to best execute the design direction.
