

## INTDS 175

Upon completing this course, students will be able to:

1. Apply criteria for material selection and environmental concerns.
2. Identify and compare types and characteristics of woods used in interior finishes, furniture cabinetry and joinery.
3. Describe how furniture is constructed and finished.
4. Identify characteristics of quality casework and upholstery.
5. Identify types of paint and finishes and typical applications.
6. Identify and compare materials used for flooring including wood, stone, tile, concrete, vinyl and carpeting.
7. Calculate measuring problems involving flooring materials, window coverings and wall coverings.
8. Describe materials used for wall construction, wallcovering, windows and window covering.
9. Identify types of cabinetry and construction.
10. Describe and select appropriate materials used for counter tops and back splashes.
11. Complete projects as part of a team.
12. Complete units of study and self-assessments independently.

### COURSE OUTLINE
