INTDS 294. ADOBE FOR INTERIOR DESIGN
COURSE LEARNING OUTCOMES (CLOs)

1. Identify elements of the Adobe Creative Suite (CS) software products, their use, and recognize the basic graphic interface and tools for each specific program.
2. Recognize and demonstrate an understanding of image resolution, image size, and image file format by producing course work to established specifications.
3. Demonstrate an understanding of design principles, graphic composition, typology and color correction by producing course work that has a strong aesthetic quality.
4. Communicate design intent through the use of Adobe CS software, by identifying the purpose of the presentation, the intended audience, and the audience needs.
5. Apply Adobe CS software to the completion of visual design/ project marketing presentations.
6. Demonstrate an understanding of the design process by applying the process to the completion of visual design projects.
