

Spokane Falls Community College  
**COURSE LEARNING OUTCOMES**

---

**Prefix and Course Number:** Math&107  
**Course Title:** Math in Society  
**Version Date:** 04/12/2019

---

**Course Learning Outcomes**

Upon successful completion of the course, the student will be able to:

1. Interpret a complex problem requiring quantitative and/or symbolic analysis
2. Justify the reasonableness and implications of mathematical solutions, and infer the limitations of the methods used in context
3. Apply mathematical processes and solutions in making personal and societal choices
4. Build appropriate representations to effectively communicate, orally and in writing, quantitative results and mathematical processes
