

Spokane Falls Community College
COURSE LEARNING OUTCOMES

Prefix and Course Number: Math 108
Course Title: College Algebra
Version Date: 04/12/2019

Course Learning Outcomes

Upon successful completion of the course, the student will be able to:

1. Apply various expressions, equations, and inequalities
2. Illustrate use of rational exponents and radicals
3. Make use of the fundamental concept of a mathematical function and all of its properties
4. Graph equations including functions and inequalities
5. Justify solutions and the problem solving process; verify and interpret solutions with respect to the original problem
