

Spokane Falls Community College
COURSE LEARNING OUTCOMES

Prefix and Course Number: Math 201
Course Title: Introduction to Finite Mathematics
Version Date: 04/12/2019

Course Learning Outcomes

Upon successful completion of the course, the student will be able to:

1. Apply a variety of mathematical models (linear, quadratic, exponential, logarithmic, polynomial) to real world situations
2. Solve systems of linear equations and inequalities and use them to model situations for problem solving
3. Apply the concepts of the mathematics of finance to solve a variety of financial applications
4. Utilize the fundamental concepts of probability in business applications
5. Make use of the fundamental concepts of statistics in business applications
