

Spokane Falls Community College
COURSE LEARNING OUTCOMES

Prefix and Course Number: Math 88
Course Title: Algebra for Math Literacy II
Version Date: 04/12/2019

Course Learning Outcomes

Upon successful completion of the course, the student will be able to:

1. Calculate descriptive statistics, and construct graphical displays of summaries of data
2. Write and solve linear equations, proportions, and systems of linear equations
3. Write and utilize linear, exponential and direct/inverse variation equations to model real world situations
4. Apply unit analysis and scientific notation at a level appropriate for non-major science courses.
