

Spokane Falls Community College  
**COURSE LEARNING OUTCOMES**

---

**Prefix and Course Number: OTA 107**

**Course Title: Human Development through the Lifespan**

**Version Date: 08/30/2019**

---

**Course Learning Outcomes**

Upon successful completion of the course, the student will be able to:

1. Explain key components of development through stages of human development, recognizing unique components of each stage along with the continuity of development over time with similarities and differences within range of normal human development.
  - a. infancy & toddler years
  - b. preschool
  - c. school age
  - d. adolescence
  - e. early adulthood
  - f. middle adulthood
  - g. late adulthood
2. Explain development – including dynamic interaction of biological, cognitive & psychosocial or social/emotional/cultural perspectives – as an ongoing set of processes, involving both continuity & change. Be able to give examples from literature & current media.
3. Contrast typical and atypical development at key points across development.
4. Summarize knowledge of global social issues and prevailing health and welfare needs of populations with or at risk for disabilities and chronic health conditions.
5. Summarize the ethical and practical considerations that affect the health and wellness needs of those who are experiencing or are at risk for social injustice, occupational deprivation, and disparity in the receipt of services.
