**Course Learning Outcomes**

Upon successful completion of the course, the student will be able to:

1. List infection control procedures to include standard, droplet, and airborne precautions and correct personal protection equipment for each.
2. Select mobility and positioning procedures for clients that use wheelchairs, walkers, canes and correct mobility methods.
3. Name wheeled mobility equipment with all parts and equipment adjustments including assembly and storage.
4. Define ideas to protect the privacy and dignity of clients in a treatment setting to include HIPAA and FERPA.
5. Relate correct procedure for monitoring all vital signs and managing health care lines in all settings.
