

Spokane Falls Community College
COURSE LEARNING OUTCOMES

Prefix and Course Number: OTA 114
Course Title: Therapeutic Activities
Version Date: 08/30/2019

Course Learning Outcomes

Upon successful completion of the course, the student will be able to:

1. Compare and Contrast occupational therapy assessments.
 - a. Understand the History of OT assessments
 - b. Identify the common assessments and rationale for each assessment used within the practice of occupational therapy, and the rationale for each.
 - c. Explain the definition and importance of standardization procedures and show the assessment administration procedures for each assessment identified in class.
 - d. Demonstrate documentation process of each assessment
2. Summarize AOTA 'Emerging practice' areas in relation to the scope of OT practice, evidenced-based practice in these areas and the historical perspective from the professions point of view.
 - a. Outline treatment techniques from emerging practice areas, and the role of the OTA in the treatment process
 - b. Define activity modification in relation to task analysis.
3. Describe the role of the occupational therapy assistant in care coordination, case management, and transition services in traditional and emerging practice environments
4. Illustrate activity modification in relation to performance areas and across the lifespan.
 - a. Identify the process of activity modification/fabrication in the context of occupational therapy case study scenarios
5. Show sources for adaptive equipment, locally, on the internet and through catalogs.
