

Spokane Falls Community College
COURSE LEARNING OUTCOMES

Prefix and Course Number: OTA 124

Course Title: Therapeutic Activities Lab

Version Date: 08/30/2019

Course Learning Outcomes

Upon successful completion of the course, the student will be able to:

1. Demonstrate an understanding of the use of technology to support performance, participation, health and well-being. This technology may include, but not limited to, electronic documentation systems, distance communication, virtual environments, and telehealth technology.
2. Summarize data for the purpose of screening and evaluation using methods including, but not limited to, specified screening tools; assessments, skilled observations; occupational histories; consultations with other professionals; and interviews with the client, family and significant other.
3. Demonstrate training techniques to enhance community mobility, including public transportation, community access and issues related to driver rehabilitation.
4. Demonstrate competence with woodworking hand tools and the sewing in relation to activity modification and fabrication.
5. Demonstrate the process of activity modification/fabrication in the context of occupational therapy case study scenarios and identifying safety procedures related to the equipment used in lab for adaptive equipment modification/fabrication.
6. Demonstrate the use of thermal and mechanical modalities as measure to improve occupational performance. On the basis of the intervention plan, demonstrate safe and effective administration of thermal and mechanical modalities to achieve established goals when adhering to contraindications and precautions.
