

Spokane Falls Community College
COURSE LEARNING OUTCOMES

Prefix and Course Number:	OTA 220
Course Title:	Occupational Performance and Mental Health Lab
Version Date:	3/2/2020

Course Learning Outcomes

Upon successful completion of the course, the student will be able to:

1. Explain how major mental illnesses including schizophrenia, mood disorders, personality and anxiety disorders, co-occurring disorders, and childhood and adolescent disorders impact occupational performance.
2. Demonstrate administration of assessments and explain procedures used in psychosocial interventions.
3. Explain knowledge and skills needed in using OT approaches with the psychiatric population.
4. Demonstrate treatment in varying models of service delivery systems in mental health practice including supportive employment, clubhouse model, Program of Assertive Community Treatment (PACT) and supported housing.
5. Examine the types of groups, use of groups and group processing used with clients with mental illness for intervention.
6. Describe advocacy of best practices when working with clients with mental illnesses.
7. Recognize, practice and communicate skills in order to refer to other mental health practitioners for intervention and consultation.
