

Spokane Falls Community College
COURSE LEARNING OUTCOMES

Prefix and Course Number:	OTA 242
Course Title:	Occupational Performance and Pediatrics - Lab
Version Date:	3/2/2020

Course Learning Outcomes

Upon successful completion of the course, the student will be able to:

1. Compare and contrast between typical and atypical development in children noting the following: postural control, reflex integration, motor control and movement quality, sensory processing and emotional development in labs.
2. Demonstrate and complete various pediatric assessments using standardized and non-standardized test administration according to context.
3. Demonstrate the ability to take a plan of care and follow through on intervention in the following areas: precautions, developmental sequence, functional strength, range of motion and movement quality, positioning, sensory processing, oral motor, adaptive skills, and adaptive equipment including orthotics.
4. Demonstrate the importance of environmental modification and adaptation for child/support success.
5. Demonstrate the approaches related to handwriting, evaluation and intervention Identifying functional and abnormal grasp and prehension patterns, designing intervention programs for identified pathology.
6. Demonstrate understanding of systems in pediatric practice.
7. Demonstrate reflexes, responses, reactions and milestones in pediatric practice and how they allow for occupational development.
