

Spokane Falls Community College
COURSE LEARNING OUTCOMES

Prefix and Course Number:	PHOTO 121
Course Title:	Location Photography I
Version Date:	11/20/2019

Course Learning Outcomes

Upon successful completion of the course, the student will be able to:

1. Apply industry time management skills to meet strict deadlines
2. Demonstrate a working understanding of location lighting controls and modifiers for augmenting or modifying existing light qualities and contrast in still photography and motion video applications
3. Apply critical thinking and problem-solving skills to create desired technical and aesthetic results in existing ambient light conditions
4. Determine and utilize appropriate light ratios of 2:1, 3:1, 4:1 and 5:1 for effective visual and emotional response while incorporating existing ambient light
5. Model safety and equipment handling protocols in a variety of location settings and applications
