

Spokane Falls Community College
COURSE LEARNING OUTCOMES

Prefix and Course Number: PTA Procedures VI: Pediatric Rehab Seminar

Course Title: PTA 212

Version Date: 10/4/2019

Course Learning Outcomes

Upon successful completion of the course, the student will be able to:

1. Describe the sequence of normal motor development and acquisition of typical balance, righting and equilibrium reactions.(7D24i)
2. Compare and contrast the principles of typical Neuromotor development that reoccur throughout development (7D24i)
3. Identify Neuromotor developmental motor milestones at ages 2 mos, 4 mos, 6 mos, 10 mos, 12 mos, 24 mos, and 36 mos, and be able to identify skills at older levels. (7D24i)
4. Describe pediatric data collection skills essential for carrying out the plan of care for the following:
 - a. Neuromotor development – Gross and fine motor milestones
 - b. Muscle performance. (7D24h)
 - c. Range of motion .(7D24l)
 - d. gait, locomotion and balance (7D24e)
5. Differentiate basic principles of pediatric physical therapy treatment approaches for diagnoses of cerebral palsy, developmental delay, myelomeningocele, Down Syndrome, sensory-motor dysfunction and selected genetic disorders.(7B)
6. Discuss implications of effective communications, behavior management and working as a team member as it relates to many stakeholders, including patients/clients, family members, caregivers, practitioners, and interprofessional team members.(7D7)
