**Course Learning Outcomes**

Upon successful completion of the course, the student will be able to:

1. Examine the software workflow by using the interface and its components to import and arrange media elements.
2. Create animated motion graphics using text, graphics, and other imported media.
3. Use shape layers and masks to isolate imagery.
4. Discover techniques and software tools that will help animate motion graphics.
5. Assemble clips, text layers and other media into a timeline-based workflow.
6. Compile projects and media assets into finalized media file.
7. Report to instructor the successful completion and delivery of project files.
